FEATURES:

- High nominal cooling capacity for consistent product temperature control
- Aluminum encased copper tube evaporator panels improve heat transfer by increasing contact area
- This increases operating efficiency and reduces power consumption
- Expansion valve for efficient operation at various temperature conditions
- Refrigerant filter drier to insure cleanliness of sealed refrigeration circuit
- Sight glass to insure a properly charged refrigeration system
- Liquid receiver for improved refrigerant charge control
- Low running current suitable for any 115 volt circuit
- Precision electronic thermostat for exact temperature control
- Includes adapter bars for use with standard 12" x 20" pans

IMPORTANT NOTE:

The refrigeration compressor requires a free flowing supply of air for proper operation. For units installed in closed cabinets a minimum unobstructed air intake of 200 sq in and a separate exhaust of 200 sq in must be supplied by the installer or cabinet maker. Failure to provide adequate air intake and exhaust will void any warranty coverage on the unit.

MATERIAL:

- TOP:** 18 gauge, #304 stainless steel, with extruded black polyethylene thermal breaker marine edge
- INSULATION:** The pan is fully insulated and foamed in place with a 1-1/4" thickness on all sides and 2" thick on the bottom and enclosed with a 22 gauge galvanized steel outer jacket. This offers a lower heat gain into product
- LINER:** Constructed of 18 gauge, #304 stainless steel, with 3" recessed top, one piece construction, all welded, ground and polished to a uniform finish. All corners are covered with a 1/4" radius. Liner is pitched towards a 1" I.P.S. drain
- REFRIGERATION SYSTEM:** The compressor is housed in a 16 gauge galvanized under structure, fabricated from formed angles and bolted to the galvanized jacket. The fully self contained condensing unit is provided with a hermetically sealed compressor with a digital, programmable thermostat. The system is fully charged with environmentally friendly R404-A refrigerant
- ELECTRICAL:** Unit will be wired for 15 amps, 120V, single phase operation with an on/off thermostat switch. 6 ft. cord with NEMA 5-15P.
2-3 Well Units: 115v, 8 Amps, 60 Hz, 1/5 HP
4 Well Unit: 115v, 8 Amps, 60 Hz, 1/3 HP
