

IMPULSE SERIES

Hot Food Display Cases

FEATURES & BENEFITS

Styling: With rounded side glass for 360° degree visibility of your products., the Open Display line has the same stylish appearance as the full line of SandenVendo Hot Food Displays.

Heating: All models come with both bottom and top down heat. The top down heat works from a combined infrared and Xenon heat lamp system, providing superior product temperature stability.

Flexible Temperature: The Open Displays are not restricted on temperature adjustment. Each shelf can be adjusted separately and can be set from Low to High. This allows for a wide variety of products to be held in the same display.

Size: The 2-shelf models have the same height and side glass profile as our HFD, HFDC and HFDM. This allows for multiple models to be lined up side-by-side to serve both wrapped and unwrapped products.

Attractive Lighting: Xenon light bulbs create a well-lit product display for maximum customer appeal.

Shelf Configurations: Designed to be adjustable, the Open Display shelves can be positioned flat, or they can be tilted to a 7° degree angle with one simple adjustment. This feature eliminates the need to purchase multiple models for changing needs in marketing and product displays.

Divider Rods: All Open Displays come standard with divider rods to provide seperation between products.

Open Hot Food Display

Designed to hold wrapped or boxed products

STANDARD

Adjustable Shelves
