
PERMA-WOOD OUTDOOR CARE

Easy Steps to Keeping Perma-wood New

JustChair's Perma-wood™ is a solid polystyrene product. It is designed to imitate aged Teak.

- Like Teak, it will lightly absorb grease and liquid.
- Unlike Teak, it can be easily buffed with the included renewal blocks for a completely new appearance.

Easy Care...

- Clean after each sitting with Windex® or a similar grease cutting cleaner.
- Every few days, buff any lingering stains with the renewal sanding block, then spray with cleaner and wipe.
- Remove any marks dents and scratches with more aggressive buffing

But...

- Do not buff against the grain, it will ruin the appearance.
- Do not buff the metal frame, it can scratch the powder coat.
- Do not use a deck or oil based sealer, it will stain clothes after drying

1.

How to Buff...

- Use the renewal sanding pad.
- Lay flat and wip once or twice in grain direction
- Spray with Windex® or similar cleaner
- Wipe with absorbent cloth

2.

3.

Just a minute,
keeps your
Perma-wood
new for years

RECOMMENDED SUPPLIES

For replacement buffing pads,
use any standard
60 grit sanding sponge

For frame scratch touch-up us
Rustoleum Automotive primer
(actually deep gray)
