

PRO-LINE™

# KEGMASTER SERIES

REFRIGERATION

Unlike traditional kegerator configurations, which can be limited, **PRO-LINE™ KEG MASTER Series**, our new line of modular chilling cabinets, is engineered to enhance keg storage while improving beverage service capacity. These units can accommodate a wide range of space and volume requirements, scaling up to fit your demands. These versatile units are optimal for venues such as sports arenas and concert halls, as they decrease the need for mid-event service or additional cold storage, thereby increasing customer satisfaction and optimizing operations during high-traffic events.

## HIGHLIGHTS

- Quick assembly/set-up
- Maximize keg storage and servicing capacity
- Eliminate downtime in high-traffic events
- Customize for direct draw applications
- Branding/POS Opportunities

## FEATURES

- Cooling unit type (horizontal/vertical)
- Durable stainless steel shelf
- Adjustable stainless steel legs, or casters available
- Glass / full door options
- Available in 6, 8, 12, 16, 20 ½ bbls configurations
