### Specifications

**OC-SEC** Model Security S/S Cabinets are constructed of type 300 series stainless steel flush face welded construction type and has a welded flat or sloped top for maximum security.

Various shapes & sizes of knives and accessories can be stored on (3) fixed stainless steel shelves provided. Optional knife hooks can be supplied with the cabinet. Double pan doors with S/S expanded metal to view contents. Two point locks with handles engage in top header and bottom shelf of unit for positive locking. All exposed surfaces are ground smooth and polished to a #4 satin finish.

Cabinet body of 18GA type 300 series stainless steel. 14GA type 300 series stainless steel double pan doors. Two point locks with handles. Heavy duty 3" welded hinges.

### Product Guide

IMC Security Cabinets are designed for sanitary, carefree use. The cabinet mounts directly on the wall and provides maximum security of knives and other accessories in an easily accessible lockable location.

Special see-thru doors permits instant inspection of cabinet contents. Slanted top discourages storage of items on top of cabinet.

Rugged stainless steel construction, engineered for high volume use and years of service.
