

DESIGN

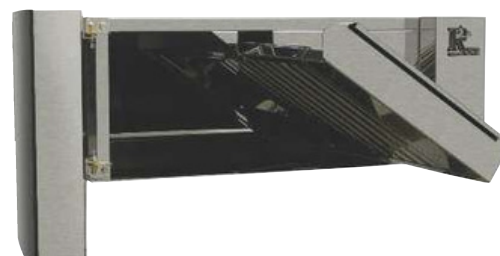

Rotisol's ventless hood system has been designed to easily fit into your operations. When and where it is not feasible or too costly to have a standard hood equipment installed or venting to the outside, this option is perfect.

Offered in three sizes, it will fit any of Rotisol's electrical basket rotisserie units. This ventless system will directly extract the cooking fumes from the top of the oven, and will filter that contaminated air. Through a double air filtration process, it will then recirculate the clean air back into the kitchen.

The ventless hood system is made of a removable and washable grease filter with metal housing and a carbon filter.

	CAP5.560 CAP8.560	CAP8.760
Dim (inch) HxWxD	68 x 34 x 11 ¾	72 x 42 ¼ x 11 ¾
