

Features

The CF-210MAX is a two unit water treatment system designed to reduce sediment, while allowing chlorine to disinfect the ice maker. The system filters to 1 micron and utilizes Citryne to eliminate water related problems caused by scale build up.

Benefits

- High quality pre-filtration
- Reduces costly equipment maintenance
- Fast-Fit cartridge system for quick change out.
- Includes Citryne for true scale elimination
- Full port shut off valve
- Pressure line gauge

Applications

- Ice

All cartridges should be changed out every six months or when there is a reduction in water pressure. Filter life depends greatly upon the quality of water. This product is for commercial use only and must be installed and maintained according to manufacturers guidelines www.systemsiv.com or the warranty can be voided.

Replacements

- CF-10 MAXRP

Includes Citryne®, which is a patented blend to eliminate the effects of scale in food service equipment.
