Consultant: _____

Item #: _____

Model #: _____

Quantity: _____

Open Sides Vary

Closed on Width &
Length Sides
(Optional or based
on where it's cut
from full sheet)

 **Specifications**

CH Model Grating is constructed of fiberglass, with molded squares & an SGF Polyester Resin.

The grid size is 1½" x 1½" square with a 1" grid height. Top grid thickness is ¼", while the bottom grid thickness is 13/64".

CH has a grit surface & features a 70% open area.

Gratings are sized up to 20" long sections.

 **Product Guide**

CH Chemgrate Grating is an ideal substitute for steel or aluminum gratings. Long life, inherent in fiberglass (often outlasts steel 20-to-1), makes CH a problem solving material where frequent replacement costs are unacceptable.

Fiberglass Gratings are corrosion resistant, structurally strong, fire retardant, lightweight, anti-slip surface & low maintenance.

 **Options**

- Custom Sizes
- Change Color to Yellow/Green (Same Price as Gray)
- Uniform Cut (Closed Ends)
- ¾" Top Grid ADA Compliant
