

★ THE QUAD

The simple and well-balanced design of The Quad Rolling Display Tower is the epitome of the maxim, “less is more.” Its minimalistic design, paired with numerous finish options, is ready to seamlessly accent any decor. The illusion of floating shelves helps to create the feeling of added space while making everything displayed on it more accessible. Whether you intend to use it as a food display, back bar, or anything in between, the four long shelves provide ample space for you to customize arrangements for any event.
