

Solid Ash Table Tops

ORIGINAL
wood seating

- 1.25" thick or 1.75" thick.
- Made in USA.
- Ash is an extremely hard wood, commonly used in baseball bats.
- Our woods are sourced locally, not imported, and have been kiln dried to 7% to prevent cupping, bowing, or splitting.
- All finishing is done in house.
- We do not use finger jointed butcher block tables because they will fail consistently.

Below: Plank style

Below: An imported finger jointed end grain with finish failure

Below: Imported table warping

Made by Us.
