

1. Increases sales by up to 30% and provides elegance and beauty to the environment.
2. Much lower investment than display cases with two rows of basins.
3. Great versatility of installation and operation, since Vista has casters that facilitate any changes of lay out and displacements for cleaning. Conventional display cases are usually fixed to the floor and do not offer this facility.
4. Easy to transport: very low weight due to the use of composite materials in its construction. Conventional display cases are very heavy because they are made with economical metallic structures.
5. Easy to maintain: the unibody construction of the tanks and the sides of the showcase allows more space in the lower part of the equipment, facilitating access to all components as well as a larger area for ventilation.
6. Resale value guaranteed because it is compact equipment of high production and equipped with state-of-the-art technology with all control systems included.
7. Can be used to expose ice cream or ice pop.
8. 10 basins of 5 liters.
9. Heated glass.

Model	Vista
Electrical Installation	208-240V, Monophase 50/60Hz
Consumption of electricity	1,5 Kw
Net Weight	130 kg
Dimensions (WHL)	1250 x 1600 x 2200 mm 49.21 x 62.99 x 86.61 in
