

AMP Series 64

HIGH-TEMPERATURE ELECTRIC DECK OVEN

Job Name

Model

WS-HD-45-E3-L

Item#

Constructed of folded stainless steel with aluminized steel top and side structure, the Electric Deck Oven combines durability with a refined, professional appearance. Its fully insulated baking chamber features a textured refractory stone deck and armored heating elements that ensure even, consistent heat above and below the baking surface.

The electronic controller provides independent top and bottom heat adjustment, 20 customizable programs, and both a timer and an "economy" mode for energy efficiency. A bottom-hinged stainless steel door with tempered glass allows full visibility during baking.

The oven reaches a maximum temperature of 850°F, suitable for any pizza style. Standard features include dual halogen lighting, a manual vapor control vent, and a stainless steel hood and stand with casters.

Its modular design allows additional decks to be added later as your operation grows.

CONSTRUCTION

Structure made of folded stainless steel

Stand—painted sheet metal

Hood—stainless steel with customizable area

Steam duct—stainless steel plate

Stainless steel door, tempered glass

Aluminized steel top and side structure

Dual halogen lighting

Rock wool heat insulation

ELECTRICAL SPECIFICATIONS

Max power/deck kW

10.1 kW

Electric Spec

28.1 A/deck - 208 VAC, 3P

COOKING CHAMBER DIMENSIONS

Ext Dims
W x D

63 1/2" x 45 1/4"

Int Dims
W x D x H

49" x 33 1/4" x 7"

Baking Surface Area
Per Deck

11.3 sq ft

CAPACITY (PIZZAS PER DECK)

WS-HD-45-E3-L

12" pizzas = 11, 18" pizzas = 4

The approximate maximum hourly production capacity can be calculated by multiplying the above numbers by (60 minutes / cook time in minutes). Cook times will vary depending on "style" of pizza.

NUMBER OF DECKS

(available as single, double or triple deck.)
