

Accessories for conneX® 12 and eikon® e2s

Oven cavity liner

Oven cavity liner

Part no. 32Z4218

Compatible with

- conneX®12 and eikon® e2s

Features

- Functional temperature range: -100°F (-70°C) -602°F (317°C).
- NON stick easy release and cleaning properties.
- Easy to install and remove.
- Easy to clean.

Installation and cleaning

- Install into a clean cold oven.
- Clean daily after oven as part of your daily cleaning schedule. Wash with general purpose cleaner and warm water with a cloth or soft non-abrasive sponge wipe surfaces to remove grease and debris. Alternatively, can be cleaned using dishwasher *note this may reduce perceived life of the product.
- After cleaning dry using clean cloth to dry. Return to oven ready for operation.
- To ensure longevity: Reverse the oven cavity liner periodically to extend its life and ensure it keeps its shape.
- DO NOT cut on the liner.
- Do not bend, fold, or roll up any part of the liner, outside of the intended bending lines.
- DO not soak in water overnight.
- Do not use harsh chemicals on the oven cavity liner.
- Product will retain its natural shape so do not lay flat for storage. Do not fold or bend to store.
- The liner is easy to clean, but its non-stick capacity naturally decreases with use, replace the liner if worn/damaged.

Specifications
