

DINEX®

ClearAir™ Insulated Dome

Product Overview

Enhance patient dining and streamline service with the **Dinex® ClearAir™ Insulated Dome**. Its transparent design allows staff to verify order accuracy instantly without lifting the cover, helping reduce heat loss and improve workflow efficiency.

Made from durable, crystal-clear copolyester for long-lasting, shatter-resistant performance. Engineered with hermetically sealed air insulation, it keeps hot food hot and cold food cold more effectively than traditional foam alternatives. Unlike foam, this air-insulated design will not degrade over time, ensuring consistent, long-lasting performance meal after meal.

The clear, modern design enhances traytop presentation by showcasing food, and supports safe, hygienic meal service. **Compatible with all brands of induction bases and Dinex® cool bases, it delivers a reliable solution for efficient patient meal delivery.** Also designed to fit over 10" and 10¼" plates, making it an excellent choice for hotel and restaurant applications.

Features and Benefits:

- **Instant Order Verification** - Clear dome allows staff to confirm meals without lifting the cover, improving accuracy while preventing temperature loss
- **Superior Heat Retention** - Airtight, air-insulated construction minimizes heat loss and consistently outperforms traditional foam-insulated domes
- **Long-Lasting Durability** - Air insulation will not break down over time, delivering reliable performance meal after meal without the issues of foam degradation
- **Hot and Cold Versatility** - Designed for both hot and cold applications, eliminating the need for separate single-purpose domes
- **Condensation Control** - Helps prevent moisture from dripping onto food, maintaining texture and meal quality
- **Safe & Hygienic Design** - Hermetically sealed construction helps eliminate potential breeding grounds for bacteria and mold
- **Space-Saving Design** - Stackable design allows domes to nest efficiently in multiple orientations, maximizing storage space
- **Durable, Elevated Presentation** - BPA-free copolyester construction resists scratches and chemicals, while the clear, modern design enhances food visibility and traytop presentation
- **Patent Pending**
