

## Cup Dispenser Units

## ROYAL SERIES

KR24-CD8

KR24-CD12

KR24-CD18

### Standard Features

- Keeps cups within immediate reach, reducing motion and accelerating transaction times during peak volume
- Utilizes otherwise wasted space beneath the bar or counter, preserving valuable top-side workspace
- Designed to hold large stacks of plastic cups, minimizing refills during rush periods
- Reduces cup waste, improves portion control, and maintains smooth service flow
- Cups are stored enclosed and off the counter, limiting handling and exposure in high-traffic environments
- Built to withstand constant use, impact, and cleaning common in concession and arena operations
- Accommodates standard plastic cup sizes commonly used in beer, soda, and mixed beverage service
- Simple underbar mounting with minimal service requirements, ideal for fast-paced operators
- Reduces bartender and concession staff movement, allowing fewer staff to handle higher volume
- Standardized solution for multi-stand, multi-concourse stadium rollouts
- Flat top to allow for registers or prep

| Model     | Overall Length (A) | Body Height (B) | Weight  |
|-----------|--------------------|-----------------|---------|
