INSTALLATION TIPS

Choose a mounting location suitable to support the full weight of the system when operating.

Never use a saddle valve for connection.

Use 3/4" water line.

Do not connect system to water-cooled condenser.

Install vertically with cartridges hanging down and allow 2 ½" (6.35 cm) clearance below the cartridge for easy cartridge replacement.

Flush cartridges by running water through system for five (5) minutes at full flow.

OPERATION TIPS

Replace cartridge when flow rate becomes inconveniently slow or before rated capacity is reached. It is recommended to replace cartridge at least once per year.

Change cartridges when capacity is reached or when pressure falls below 10 psi (0.7 bar).

Always flush the filter cartridge at time of installation and cartridge change.

Inspect Everpure EC210 Cartridge periodically to determine dirt load.

Replace Everpure EC210 Cartridge when dirt has penetrated through to the inner core of the cartridge.
