

## FP 35 - FP 50

(1)

(2)

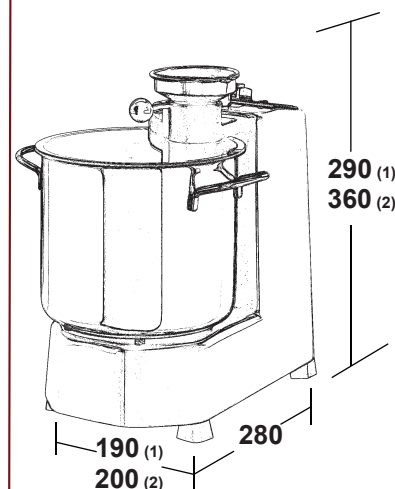

Technology joined to simplicity to face different experiences. Perfect in kitchens and in gastronomies, it cuts, chops, kneads and whips any products in few seconds.

- Food bowl with rounded bottom to allow a perfect cleaning and with thermic bottom that allows to use the pot directly on the fire. More than one pot can be used with the same base
- Food bowl and cutting group completely built in stainless steel
- Combining of inclination and incidence of the food bowl with the cutting group to guarantee a good result, either with little or big quantities of product, thanks to the blade that grazes the bottom of the food container leaving a very slight quantity of unprocessed product
- Smooth and transparent lid in Perspex to check the processing of the product, provided with an appropriate opening that allows to add product even during the processing

FP 35: 3,5 litres food container capacity

FP 50: 5 litres food container capacity

Model	Capacity Litre	W	Volt	Kg
FP 35 (1)	3,5	400	230/60	12
FP 50 (2)	5			13
