

# Go Range

Boosting the 'on the go' service: products to be consumed on the go. Contactless or Self-Service juicers and accessories such as bottles or displays will help you consolidate the 'on the go' service. Nowadays, any shop can access home delivery thanks to delivery

platforms. Including freshly squeezed juice in your delivery is possible with Zummo's customisable juicers and bottles, a plus that will increase your customers' loyalty and increase their average ticket.

## Z14 Nature Select GO

Choose your product in the most simple way.

With the Z14 Nature Select you can select the product on the touch screen, e.g. whether you choose glass or bottle, even the size of the containers. With the Barcode Scanner included under the touch screen you can also scan the barcode of the recipient of your choice to serve the juice automatically and guarantee zero contact with the machine.

# Discover contactless Juicing

## 1. EVS®Advanced

Unique vertical juice extraction system; a Zummo exclusive. Based on manual juice extraction system it achieves maximum profitability, obtaining the purest possible juice with the greatest operational functionality.

## 2. Juice extraction kits

The different-sized juice extraction kits help to maximise the yield of the juice extracted from the fruit depending on its diameter. Easily identifiable thanks to the characteristic colour of each range: Medium (M): Orange; Large(L): Maroon.

A system developed by Zummo to assemble and disassemble the balls of the kit in just one movement.

Juice extraction kits

## 3. Automatic filter

Comprised of a belt that starts to move when the juice extraction starts up, sweeping away the seeds and pulp that remain in the filter: greater juice extraction performance and greater autonomy.

Automatic filter

## 4. Barcode reader

The machine includes as standard a barcode reader connected to the touch screen interface in order to establish a barcode associated with each of the active products. In this way the customer simply scans the container and the machine will automatically dispense the quantity set for that product.

Barcode reader

## 5. Touch screen

With an intuitive interface developed specifically for this model, the customer can select the different product variants available for sale. The products are added from the same screen through the administrator function and allows the possibility of having up to four different products active, configurable by type (glass, bottle) and size (S, M, L, XL).
