CHANGING SETTINGS

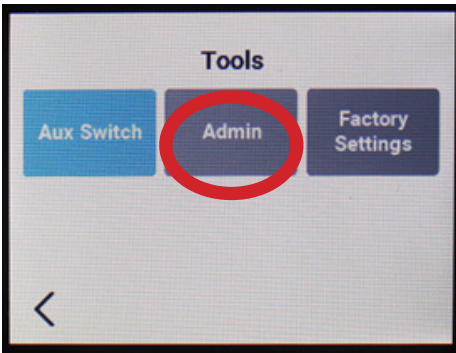

1 Select the **settings icon**.

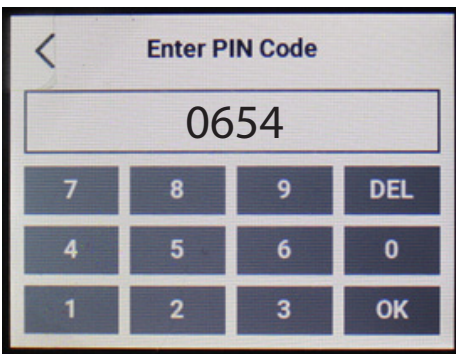

2 Select **Tools**.

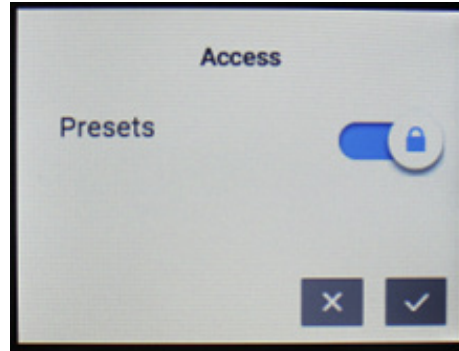

3 Select **Admin**

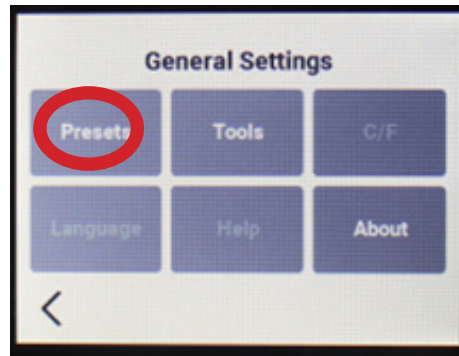

4 Enter pin code 0654

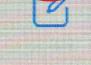

5 By default Presets will be "Locked" Slide the toggle to the unlock position and select the check mark.

6 Now select Presets.

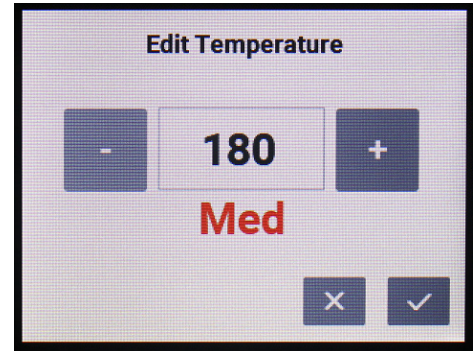

7 The 2 current presets will be displayed. Low and Medium. Select the edit icon next to the preset to be changed in the Actions column

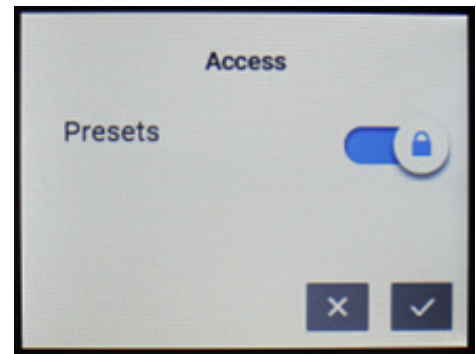

Temperature Settings			
Preset	Temp	Status	Actions
Low	140 °F	✓	
Med	160 °F	✓	

Note: Set points may differ depending on unit.

8 Use the Plus and Minus buttons to modify the Temperature. The temperature will decrease or increase by 1. When done select the **CHECK** button to save or the **X** to cancel.

9 Return to the Access screen and lock the presets.

10 Return to the main screen. The new setpoint will now be used for the appropriate runtime screen.
