#### **EOMV** Series Model: EOMV-60-B-28-S

## Refrigeration System

Bottom mounted, self-contained and fully detachable Blizzard R290 condensing unit uses environmentally friendly, EPA-compliant R290 refrigerant with zero (0) Ozone Depletion Potential (ODP) and three (3) Global Warming Potential (GWP). Blizzard R290 is easily replaceable and requires no on-site brazing

- Front air intake and rear air discharge design allows side by side installation. Conforms to NSF Standard 7 TYPE II (maximum ambient temperature 80°F)
- Electronically commutated (ECM) evaporator fan motors achieve rapid cooling with less energy consumption.

High performance, auto-reverse condenser fan motor supports compressor ventilation and condenser coil cleaning. Refer to owner's manual for full maintenance instructions.

- Large capacity, corrosion-resistant condenser and evaporator coils.
- Self-maintaining, energy-efficient condensate drain pan requires no external drains or electric heaters.
  Pre-wired and ready to plug, 115V/60Hz/1Ph, NEMA 5-20P.

#### Cabinet Construction

· Black or white modern exterior has moisture-resistant panels and field- replaceable tempered glass.

Heavy-duty stainless steel interior has perforated back wall for efficient air flow. Includes floor drains for ease of cleaning.

- · Galvanized steel top, bottom and rear.
- 2.5" thick high-density polyurethane insulation.
- Integrated retractable night curtain saves energy and provides security.
  5" swivel casters with locks on front set. Leg stabilizers standard for all models.

### Lighting

· Shielded LED bar lighting under shelves and canopy provide bright, high color illumination at lower heat output. On/off switch saves energy

### Shelving

· Adjustable by height and angle. Position it flat or slanted downward at 10°.

Heavy duty stainless steel shelves include price tag moldings.

## **Temperature Control**

· Factory preset temperature of 35°F maintains a combined average product temperature of 40°F or less. Audible overheat protection alarm for compressor and condenser coil.

#### **Recommended Operating Conditions**

 $\cdot$  Conforms to NSF standard 7 TYPE II designed to operate in an air-conditioned environment where temperature and humidity do not exceed 80°F and 55% relative humidity.

· Must not be installed near ventilation systems, fans or exterior doors or windows that will disrupt the air curtain and compromise the function of the cabinet.

· Must not be installed in direct sunlight.

In built-in applications, a distance of 6" is required on the front, back and top exterior for ventilation purposes.
