

# FREIGHT PROGRAM 2023

We're excited to share the launch of Infrico's new 2023 Freight Program! We believe this program will help our Rep force become even more aggressive when quoting projects, as it offers a much less time-consuming freight quoting process and more cost-effective options for your customers.

We understand that freight can be a real hassle, which is why we've created this program to make your lives easier. Here's the best part: the freight program will be calculated as a percentage of the net PO, no matter where you're shipping. Of course, some restrictions may apply, please contact your local Factory Rep for more information about this program.

And the cherry on top? This program is effective immediately! That's right, no more calls or emails to our office - just more time for you to focus on your customers. You can start using the new program right away and enjoy a hassle-free freight experience.

We're excited to see how this new program will benefit you and your customers. As always, thank you for your continued support, and let's make 2023 a great year for all of us!

**Please contact your local Factory Rep for more information about this program.**
